

# OPERATION MAGNETIC RESONANCE

**Operation Name:** Operation Magnetic Resonance

**Objective:** Execute a strategic assault on the Keyhole/Dam in G10, codenamed Operation Magnetic Resonance, with the goal of destroying enemy structures and neutralizing resistance.

**Target Location:** Keyhole/Dam in G10

**Obstacles:**

1. Lag:
  - Potential lag issues may impact movement and combat effectiveness. Adapt tactics accordingly.
2. Enemy Thralls:
  - Expect enemy thralls guarding the target location. Neutralize or avoid them to minimize resistance.
3. Enemies:
  - Anticipate the presence of enemy forces and devise strategies to overcome their defenses and counterattacks.
4. Counteroffensive Attacks:
  - Maintain constant vigilance for possible enemy counteroffensive attacks on our base or Forward Operations Base (FOB). Be prepared to defend if necessary.

## Communication and Focus:

- Maintain clear and concise communication throughout the operation.
- Strict adherence to professionalism and discipline, with no unnecessary discussions or distractions.
- Keep communication focused on the objective and ensure a strong sense of unity among the team.

## Assault Plan:

1. FOB Preparation:
  - Establish a fortified and strategically positioned Forward Operations Base (FOB) near the target location.
  - Deploy thralls and zombies for maximum combat effectiveness.
  - Ensure all team members are fully equipped and present at the FOB 30 minutes prior to the assault.
2. Initial Bombing:
  - Initiate the assault with a coordinated bombardment, employing an initial wave of 50 bombs equally distributed between the two designated BOMBERS (25 bombs each).
  - Objective: Provoke the enemy into leaving their base. If no response, continue bombing their structures.
  - If the enemy responds, utilize the BOMBERS firepower while ensuring their protection from enemy attacks.
3. Squad Wiping and Resumption of Bombing:
  - Engage in relentless combat to either force the enemy back into their base or eliminate their resistance through squad wiping.
  - Once successful, regroup and resume targeted bombing of their structures.
  - Assign dedicated FIGHTERS to prioritize bomber protection against enemy assaults.
4. Gravestone Placement:
  - Assign a skilled HYBRID FIGHTER to strategically place gravestones within the target location.
  - Gravestones will impede the enemy's ability to construct additional defensive structures and hinder their operations.
5. Rescuing Trapped Teammates:
  - Establish immediate response protocols in the event of team members becoming trapped.
  - Designate a single team member to rip their bracelet, escape the situation, and summon their body. This action may create opportunities for other trapped individuals.

## Base Infiltration:

- **Prioritize the destruction of critical structures within the enemy base.**
- **Sequential Destruction Order:**

- Beds: Disable enemy respawning capabilities and weaken their control.
  - Altars, Chests, Benches: Disrupt their operations and limit their access to vital resources.
- Emphasize the primary objective and disregard enemy loot.
  - Employ the de-spawning of bags to reinforce an image of ruthlessness and instill fear in our adversaries.
7. Fighter Engagement:
- Engage enemy combatants within the base using coordinated tactics and superior teamwork.
  - Prioritize the elimination of enemy forces while remaining prepared to defend against potential counterattacks.
  - Assign **HYBRID FIGHTERS** to secure entrance points, preventing enemy reinforcements.
  - Ensure BOMBERS support the **FIGHTERS** by securing kills before pushing deeper into the enemy base.

## Equipment and Resources:

- **Armor Kits: Prepare and distribute the following kits among team members based on their roles:**
  - Agility Kits: Black Corsair or Ranger Armor for enhanced agility.
  - Strength Kits: Silent Legion Light Gloves, Voidforge Dragon Hide, Perfected Light Kits for increased strength.
  - Mixed Kits: Perfected Light, Climbing Boots, Kurak Leggings for versatile performance.
- **Weapon Kits: Ensure the availability of the following weapons and ammunition:**
  - Khari Bows for ranged combat.
  - Star Metal Arrows and Obsidian Arrows for ammunition.
  - Serpent Man Throwing Axes for throwing projectiles.
  - Dagon Daggers (skinned with Ancient Daggers) and Ancient Lemurian Axes (skinned with King Slayer Pole Arms) for extended reach.
  - Star Metal Great Axes and Ancient Lemurian Axes for heavy melee damage.
- **Building Resources:**
  - Gather the necessary resources for constructing a Forward Operations Base (FOB) and two War Pyramids, including:
    - 4 stacks of Hardened Brick.
    - 3 stacks of Shaped Wood.
    - 2-3 stacks of Steel Reinforcements.
    - 1 stack of Iron Reinforcements for chests.
    - 6-7 Vaults for secure storage.
- **Stockpile resources at the FOB, including:**
  - 1000 Dragon Powder at the base.
  - 1000 Dragon Powder distributed among vaults and chests as backup.
  - 1000 Jars for explosives.
  - 5000 Tar for crafting purposes.

- 100 Bed Rolls for respawning and regrouping.
- 100 Poison Potions for offensive and defensive use.
- 100 Set Potions for healing and curing ailments.
- 50 Agility Buffs for enhanced mobility.
- 50 Strength Buffs for increased combat effectiveness.
- 200 Salted Pork and 200 Salted Exquisite Meat for sustenance during extended operations.
- 100 Cloth Pouches, 100 Leather Pouches, and 100 Burlap Pouches for storage and organization.
- 400 Feasts of Yog for rapid healing and regeneration.
- 1000 Pure Aloe Extract Potions for healing and cleansing.
- 20 Arcane Staves for sorcery-based attacks.
- 50-60 Zombies with a minimum health pool of 5000 each for additional combat support.
- 5000 Feral Flesh for healing the zombies and thralls.
- 10 Thralls assigned to defend the FOB and provide support during the assault.
- 100 Palisades for fortifying the FOB against enemy zombie attacks.

#### • **Thrall Kits:**

- Equip thralls with the following gear for maximum combat efficiency:
  - Godbreaker Helm for increased protection.
  - Godbreaker Grips for enhanced gripping strength.
  - Voidforge Dragon Ribs for sturdy chest armor.
  - Champion Leggings for superior leg protection.
  - Pictish War Boots for improved footwork and stability.

## Step 1: Preparation and Resource Acquisition

#### • **Establish the Forward Operations Base (FOB):**

- Choose a strategic location near the mountains in grid G10. [Insert image of FOB location]
- Construct the FOB using the gathered resources:
  - Use the 4 stacks of Hardened Brick to create a solid foundation and walls.
  - Utilize the 3 stacks of Shaped Wood for structural components.
  - Reinforce critical sections with 2-3 stacks of Steel Reinforcements.
  - Allocate 1 stack of Iron Reinforcements specifically for chest reinforcement.
  - Set up 6-7 Vaults to securely store valuable resources.

#### • **Positioning of Zombies and Thralls:**

- Place the Zombies and Thralls atop the FOB to provide additional defense.
- Ensure each Thrall is fully geared, equipped with healing food (Gruel), and has a clear understanding of their assigned role.

#### • **Distribution and Availability of Equipment:**

- Organize bows, arrows, and sorcery equipment for easy access and readiness.
- Each defender should have their own bow, arrows, and sorcery items readily available on their person.
- Encourage team members to maintain a keen eye for enemy assault attempts and communicate any threats promptly.

- Emphasize the importance of clear and concise communication, avoiding unnecessary distractions or unrelated discussions.
- **Assigned Roles:**
  - Establish a rotation schedule for defense shifts, allowing team members to swap every hour during raid time.
  - Designate specific individuals to be in charge of checking the event log and promptly disabling the teleporter in case of an attack on other structures.
  - Ensure that Jhebbal Sag potions are readily available for teleportation purposes and be prepared to despawn items if necessary.

Verify that all equipment and resources are in place and that team members are well-versed in their roles and responsibilities to ensure a coordinated and efficient execution of Operation Magnetic

## Step 2: Defense Planning

- **Identify the Target: The primary objective of Operation Magnetic Resonance is the destruction of Keyhole/Dam in grid G10.**
- **Anticipated Obstacles:**
  - Lag: Recognize the potential for lag during the operation and remain vigilant in adapting to changing circumstances.
  - Enemy Thralls: Expect the presence of enemy thralls during the assault and prepare to engage or neutralize them.
  - Enemy Forces: Assume the enemy will have a defensive presence and plan accordingly.
  - Counteroffensive Attacks: Be aware of the possibility of the enemy planning a counteroffensive on the FOB or base and devise strategies to counter such attacks.
- **Effective Management of Obstacles:**
  - Lag Mitigation: Optimize individual settings and connectivity to minimize lag-related issues. Maintain clear and concise communication to ensure effective coordination despite any lag experienced.
  - Engagement with Enemy Thralls: Prioritize the elimination of enemy thralls to weaken the enemy's defenses and create openings for advancement.
  - Combat Tactics against Enemy Forces: Employ a combination of offensive and defensive strategies to overpower and neutralize the enemy forces encountered during the assault.
  - Counteroffensive Preparedness: Implement a robust defensive strategy to deter and repel potential counteroffensive attacks. Maintain constant vigilance and promptly respond to any signs of enemy aggression.
- **Communication Protocol:**
  - Emphasize the importance of clear and efficient communication throughout the operation.
  - Maintain disciplined comms to ensure information flow without unnecessary distractions or unrelated discussions.
  - Encourage team members to promptly relay information about enemy movements, positions, and any critical developments.
- **Focus on the Objective:**
  - Instill a sense of purpose and determination among team members, emphasizing the objective of becoming a feared entity in the battle arena.
  - Discourage any non-essential conversations or distractions that may divert focus from the mission at hand.

By acknowledging the potential obstacles, formulating effective strategies to manage them, and fostering clear communication and focus on the objective, the team will be better prepared to face the challenges presented during Operation Magnetic Resonance.

### Step 3: Assault Planning and Job Roles

- **Objective:** Secure the Keyhole/Dam in grid G10 and establish dominance in the area.

#### Assault Phase:

##### 1. Initial Bombing Run:

- Prior to the assault, ensure all team members are present and equipped at the FOB, ready for action 30 minutes before raid time.
- Initiate the assault by deploying an initial wave of 50 bombs, with each bomber carrying 25 bombs.
- The objective of the bombing run is to draw out the enemy from their base.
- If the initial bombing does not provoke a response, continue the bombardment until the enemy reacts.
- Once the enemy is engaged, the **BOMBERS** will provide fighting support while the **FIGHTERS** focus on eliminating enemy combatants.

##### 2. Engaging the Enemy:

- Transition the **BOMBERS** from bombing to aerial combat support once the enemy is engaged.
- Prioritize protecting the **BOMBERS** to ensure their sustained effectiveness.
- The **FIGHTERS** will engage the enemy forces directly, employing a combination of offensive tactics and defensive maneuvers.
- Maintain a focus on the priority targets: **BOMBERS**, FOB, and self.

##### 3. Gravestone Placement:

- One **HYBRID FIGHTER** designated for gravestone placement will be responsible for limiting the enemy's ability to construct defensive structures.
- The designated fighter will strategically place gravestones to block enemy building placements, hindering their defensive capabilities.

##### 4. Tactical Maneuvers:

- In the event team members become trapped, designate one person to rip their bracelet and summon their body to escape.
- Exploit the enemy's attempts to access the trapped individual's body as an opportunity for other trapped team members to escape.

##### 5. Infiltration and Base Assault:

- Once the team breaches the enemy's base, prioritize the destruction of enemy beds, altars, chests, and benches.
- Disregard the loot and focus solely on eliminating vital infrastructure.
- De-spawn loot bags to enhance the perception of our indifference towards material possessions and maintain focus on the mission.
- **FIGHTERS** should engage in close quarters combat within the enemy base, while the hybrids cover the entrance and the **BOMBERS** provide support.

Ensure that all team members are familiar with their assigned roles and responsibilities. Emphasize the importance of coordination, effective teamwork, and adaptability throughout the assault phase of Operation Magnetic Resonance.
